

Uppsala University hospital invites application for the full time permanent position:

Medical Geneticist/Clinical Geneticist – Physician

Uppsala University Hospital is one of Sweden's leading university hospitals with more than 8 000 employees, 1 000 hospital beds and a large scale of out-patients. In addition to the role as county hospital we also supply highly specialized healthcare and is serving two million people in central Sweden

Job summary

The unit of Clinical Genetics has a full range support staff and an approved residency program in Clinical/Medical Genetics. The unit employs 55 staff-members, including 11 salaried physicians. We provide active and well integrated clinical genetics service, including prenatal diagnostics, pediatric and adult genetics, cancer genetics and neurogenetics. Besides inpatient consults, we participate in weekly multidisciplinary cancer, perinatal and pediatric conferences.

About the position

The position entails supervision of residents in clinical genetics as well as tight interactions with other staff-members. The unit provides laboratory analyses in house, including NGS technology at the edge. An established interaction with Science for Life Laboratory, a nation-wide effort in Sweden, creates excellent possibilities for research and development in the field of Medical Genetics. We are accredited for our diagnostic service through SWEDAC.

Qualifications

Applicant should be certified or eligible in Clinical Genetics. Academic rank and scientific merits will be commensurate with experience. Personal characteristics will be considered.

Position

Full-time and permanent position. Admittance by appointment.
