

Sahlgrenska University Hospital Gothenburg, Sweden

Is hiring Specialists in Psychiatry with experience in:

- Addictions
- Affective Disorders
- Eating Disorders
- Psychosis
- Forensic Psychiatry
- Geriatric Psychiatry
- Intellectual Disabilities

The Sahlgrenska University Hospital is a system of hospitals associated with Sahlgrenska Academy at the University of Gothenburg, Sweden. The hospital is one of the largest hospitals in Northern Europe. As a regional centre, it serves approximately 900,000 people. The hospital also offers highly specialized medical care for the whole of Sweden. The staff number rounds up to 17,000. Our psychiatry department within Sahlgrenska University Hospital has both outpatient and inpatient care with different facilities throughout Göteborg.

ADDICTIONS DEPARTMENT

The Addictions Department provides assessment and treatment for complicated abuse or addiction to alcohol, addictive drugs and narcotics. The business also caters for people with psychiatric problems, in combination with the above. Family members and relatives can obtain advice and support.

Depending clinics consist of inpatient Östra Hospital and Nordhems Clinic. Outpatient care is geographically diverse, with responsibilities for various areas. In addition, there are specialist clinics for women, youth, social functioning of people with substance abuse/dependence, heroin addiction and mental illness.

Responsibilities

Psychiatrists should diagnose and treat psychiatric illness and concurrent substance abuse/dependence in the acute stages. Also must supervise the doctors and prospective specialists and participate in the development of health department of psychosocial treatment interventions. The psychiatrist should be the hub of the clinic treating operations and shall, together with the other doctors stand medical expertise but at the same time be flexible and cooperative and respect that other professions contribute with unique knowledge of their respective areas

AFFECTIVE DISORDERS DEPARTMENT

The psychiatric clinic **Affektiva II** offers specialized psychiatric care to people living in the centre of Goteborg, in the western part of the city and Hisingen (city area). We accept patients with affective disorders, anxiety disorders and other general psychiatric conditions, except for psychotic illnesses.

The psychiatric outpatient Västra Frölunda is a **general psychiatric outpatient centre** owned by **University Hospital Sahlgrenska, Psychiatry Affektiva II**. We cover the following areas: Askim, Frölunda, Högsbo, West Gothenburg, Lundby and West Hisingen. The psychiatric team consists of a psychiatrist, psychologist, nurse, social worker, physiotherapist and occupational therapist. The clinic consists of five groups with a total of approximately 35 employees. The target group are the patients with severe depression, anxiety disorders, personality disorders and neuropsychiatric disorders.

Responsibilities

Taking care of patients who need specialized care for mental health, assessment, monitoring and further research. You are the leader of the psychiatric interdisciplinary team. Such tasks include training in each specialty (ST) and medical practitioners (AT) that as part of their specialty practiced for a time in the office. Also involved in research and development as the improvement of the clinic.

INTELLECTUAL DISABILITIES

Nursing Psychiatry

Consultative activity with investigation, overall evaluation and treatment of patients with difficult to treat, challenging behaviour and development disorders, when psychiatric interventions at county hospitals have not been enough. Possibility of residential / in-patient care for observation.

The unit conducts out-patient and in-patient care in multi-professional teams. It is important to establish a good collaboration between healthcare providers and with the local authorities and other municipalities, since many in the patient group have several disabilities and health problems. Beside nursing psychiatry, sub-specialized geriatric psychiatry and investigation and treatment of dementia are also carried out.

The salary situation is the same for the whole SU-psychiatry, with an entry salary of minimum 57 500 SEK (the 2018 initial entry salary) and when the doctor starts working independently with Swedish specialist licence, there will be an individual set salary with approx 1000 SEK wage increase/year of experience from the homeland.

EATING DISORDERS DEPARTMENT

Responsibilities

Your daily work will include patient-centered care with both diagnosing and treating patients with the diagnosis of Anorexia Nervosa and Bulimia Nervosa.

Our inpatient department for Anorexia Nervosa and Bulimia Nervosa includes in total 8 beds for patients with above diagnosis. You will work close together with nurses, psychologists and physiotherapists. You will also work in a close collaboration with colleagues at the subspecialized outpatient clinic for eating disorders. The outpatient clinic is located in the same hospital building as the inpatient ward. Additional work assignment includes tutoring students and interns. Clinical research will also be part of the position. We closely collaborate with the Sahlgrenska Academy.

DEPARTMENT OF PSYCHOTIC DISORDERS

In-patient position

The in-patient section consists of 4 wards with 10-12 beds each. Approximately 3 nurses and 2-3 auxiliary nurses work at every ward per day (+ night shift) and the physician team is usually one specialist, one resident and 1-2 interns or other junior doctors. Average time of stay is about four weeks; the treatment and planning is highly coordinated with the responsible out-patient doctor. A person-centred working model is currently being developed and implemented. Working hours: 8 am to 4.45 pm.

Main responsibilities:

- Daily team meetings
- Coordination meetings with out-patient units and municipal social workers
- Patient interviews
- Supervision and guidance of physician students and junior doctors
- Responsibility for compulsive care (applications to court, weekly negotiations with a judge, decisions on medication, submission, clamping of patients etc.)

Out-patient position

The out-patient section consists of 8 units distributed over different parts of the Gothenburg area, each consisting of 1-4 multidisciplinary teams, working in accordance with the care model "Integrated Psychiatry" (in scientific papers often referred to as R-ACT) where each patient has a Case Manager. Three of the out-patient units also have 7-8 beds for less acute patients and two of them have mobile teams that can visit patients after office hours. Working hours: 8 am to 4.45 pm.

Main responsibilities:

- Weekly team meetings
- Patient visits (mostly at the unit but sometimes in the patients' homes)
- Prescription of medications
- Certificates for social security and other authorities
- Coordination of care for hospitalized patients
